

## MDC 2018-28 Long Term Plan Submission

### Picton Smart and Connected Public Spaces Working Group Picton & Waikawa Submission

---

Picton Smart & Connected Public Spaces Working Group meets regularly to review the community's needs for public spaces within the Picton and Waikawa areas. This submission includes a detailed breakdown of priority works in the coming decade.

Picton is home to a diverse community, ranging from young families to retirees, it is also the entrance point for over one million ferry passengers per annum, and in the coming years we estimate there will be visits from 45+ cruise ships. In the peak summer season the town swells with holiday makers. These factors make Picton unique within the Marlborough region.

We have worked closely with the Bike/Walk Working group to keep walkers and cyclists top of mind in these plans, and have focused on key entrances to the town so that we are working towards a vibrant and desirable environment that locals will love spending time in, and tourists will also enjoy as a destination.

The working group has gathered feedback from local people, iwi, visitors, businesses, landlords and operators about the following items. As such, we believe we are offering a clear message from all stakeholders.

Many of the items within this submission relate to ongoing maintenance and provision of services, utilities and upgrades of roads and walkways.

We support:

- a management plan for all parks and reserves in Picton
- safety, accessibility and protection of our environment
- safeguarding the Picton foreshore as a New Zealand icon
- making our roads and footpaths suitable for all types of traffic ranging from trucks, cars, mobility scooters, walkers, bikes and tourists
- early engagement with Port Marlborough, Marlborough District Council and Marlborough Roads with our working groups

## Time line

### Year 1

1	Wayfinding	Funding to complete the town signage project
2	Dublin Street	New footpath from Auckland St to Kent St suitable for foot and bike traffic

3	Dublin Street	Upgrade of roadway
